PROFESSIONAL SUMMARY

Data Engineer with a Computer Science degree and hands-on experience designing data pipelines, ETL/ELT processes, and data warehouses using SQL, Python, PostgreSQL, and Apache Airflow. Skilled in data modeling, schema design, and building reliable, well-documented pipelines that support analytics. Seeking a remote Data Engineer role to build scalable data infrastructure.

TECHNICAL SKILLS

Languages: SQL, Python (Pandas, NumPy, Scikit-learn)

Data Pipelines & Orchestration: Apache Airflow, Apache Kafka, ETL/ELT, Batch and Streaming Processing

Databases & Warehousing: PostgreSQL, Data Warehousing, Data Modeling, Star Schema, Snowflake Schema, Schema Design

Analytics & Tools: Power BI, Excel, Git, GitHub

PROJECTS

Data Warehouse Project | PostgreSQL, SQL, Python, Git

- Designed and built a data warehouse in PostgreSQL using dimensional modeling with fact and dimension tables (star schema) for analytical reporting.
- Developed ETL processes to extract, clean, transform, and load source data into the warehouse, applying data quality and consistency checks.
- Wrote optimized SQL queries (joins, aggregations, subqueries, ROLLUP/CUBE/GROUPING SETS) to support analytics and reporting requirements.
- Version-controlled and documented the project on GitHub for reproducibility.

Airflow ETL Pipeline | Apache Airflow, Python, SQL

- Built an Apache Airflow DAG that automates an end-to-end ETL workflow, defining tasks, dependencies, and scheduling.
- Implemented extract, transform, and load steps in Python and monitored task runs to troubleshoot and improve pipeline reliability.

Stock and Revenue Dashboard | Python, yfinance, BeautifulSoup, Plotly, Jupyter

- Extracted stock price data with yfinance and scraped company revenue data from web pages using BeautifulSoup.
- Cleaned and transformed the extracted data with Pandas, then built interactive Plotly dashboards comparing stock price and revenue.

EDUCATION

Bachelor of Computer Science, Future Academy, Cairo, Egypt

2020 – 2024 | Final Grade: Very Good

CERTIFICATIONS

- IBM Data Engineering Professional Certificate
- IBM Data Analytics Professional Certificate
- Introduction to Data Analytics, Coursera

LANGUAGES

Arabic, English
